Manage Event Use Case

Use Case Name	Manage Event
Primary Actor	Event Organizer
Description	The Event Organizer manages university events by creating, editing, publishing, or cancelling an event.
Preconditions	The Event Organizer is logged in. An event must exist to edit, publish, or cancel it.
Main Flow	1. The Event Organizer selects Manage Event. 2. The system displays the available operations: Create, Edit, Publish, and Cancel Event. 3. The organizer selects one operation. **Create Event** 4. The organizer selects Create Event. 5. The system displays the event form. 6. The organizer enters the event details. 7. The organizer selects Save as Draft. 8. The system saves the event with Draft status. **Edit Event** 9. The organizer selects Edit Event and chooses an existing Draft or Published event. 10. The system displays its current details. 11. The organizer updates the details and selects Save Changes. 12. The system saves the changes without changing the event status. **Publish Event** 13. The organizer selects Publish Event and chooses a Draft event. 14. The system displays the event details. 15. The organizer selects Publish. 16. The system changes the event status to Published and makes it visible to students. **Cancel Event** 17. The organizer selects Cancel Event and chooses a Published event. 18. The system displays the event details. 19. The organizer confirms the event cancellation. 20. The system changes the event status to Cancelled and keeps the event visible with its cancelled status.
Alternative Flows	11. The organizer updates the event details. [Cancel editing] The organizer selects Cancel instead of Save Changes. The system discards unsaved changes, and the event remains unchanged.
Exception Flows	7. The organizer selects Save as Draft. [Missing or invalid event details] The system displays an error message and does not save the event until the information is corrected. 11. The organizer selects Save Changes. [Missing or invalid event details] The system displays an error message and does not save the changes until the information is corrected.

	15. The organizer selects Publish. [Missing or invalid event details] The system displays an error message and does not publish the event until the information is corrected. 8, 12, 16, or 20. The system processes the requested operation. [Operation fails] The system displays an error message, and the requested operation is not completed.
Postconditions	After Create: a Draft event exists. After Edit: event details are updated and its status is unchanged. After Publish: the event is Published. After Cancel Event: the event is Cancelled.
